Editorial Board

Australia:	Professor E. J. Anderson, University of New South Wales, Sydney
Belgium:	Professor W. Herroelen, Katholieke Universiteit Leuven
Canada:	Professor G. Abdulnour, Université du Québec à Trois Rivières
France:	Professor F. B. Vernadat, European Commission, Luxembourg
Finland:	Professor H. E. Andersin, Helsinki University of Technology
Germany:	Professor H. Dyckhoff, RWTH Aachen
	Professor G. Zülch, Karlsruhe University
Greece:	Professor C. H. T. Papadopoulos, University of the Aegean, Syros
India:	Professor S. Sahu, Indian Institute of Technology, Kharagpur
Israel:	Professor M. Barad, Tel-Aviv University
	Professor A. Shtub, Technion, Haifa
Italy:	Professor A. Villa, Torino Polytechnic
Japan:	Professor M. Yoshimura, Kyoto University
	Professor H. Ohta, Osaka Prefecture University
The Netherlands:	Professor Dr J. W. Bertrand, Technische Universiteit Eindhoven
	Dr E. M. Goldratt, Dijkstraat, VG Roelofarendsveen
New Zealand:	Professor L. M. Corbett, Victoria University of Wellington
Poland:	Professor Jan Weglarz, Poznan University of Technology
PR China:	Professor E. W. T. Ngai, Hong Kong Polytechnic University
	Professor G. G. Zhang, Chongqing University
Serbia:	Professor P. Kovac, University of Novi Sad, Vojvodina
Singapore:	Professor A. Y. C. Nee, National University of Singapore
South Korea:	Professor H. Hwang, Korea Advanced Institute of Science and Technology
Sweden:	Professor R. W. Grubbström, Linköping Institute of Technology
Taiwan:	Professor A. C. Lin, National Taiwan University of Science & Technology, Taipei
United Kingdom:	Professor C. B. Besant, Imperial College of Science and Technology, London
	Professor K. Case, Loughborough University
	Professor T. J. Hill, University of Oxford
	Professor R. H. Hollier, UMIST, Manchester
	Professor J. E. L. Simmons, Heriot-Watt University, Edinburgh
USA:	Professor J. F. Bard, The University of Texas at Austin
	Professor P. Dewhurst, University of Rhode Island
	Professor E. A. Elsayed, Rutgers State University, Piscataway, NJ
	Professor M. J. Magazine, University of Cincinnati
	Professor F. Mahmoodi, Clarkson University
	Professor S. A. Melnyk, Michigan State University, East Lansing
	Professor D. C. Montgomery, Arizona State University, Tempe
	Professor B. R. Sarker, Louisiana State University
	Professor S. Talluri, Michigan State University
	Professor D. L. Woodruff, The University of California at Davis
Founding Editor:	Professor N. A. Dudley, Emeritus Professor, University of Birmingham, UK

International Journal of Production Research

Volume 42, 2004—CONTENTS

No. 1 1 January 2004

A heuristic methodology for order distribution in a demand driven collaborative supply chain. F. T. S. Chan, S. H. Chung and S. Wadhwa 1

Finding effective schedules for the economic lot scheduling problem: A simple mixed integer programming approach. D. L. Cooke, T. R. Rohleder and E. A. Silver 21

Process planning and NC-code generation in manufacturing of press dies for production of car bodies. D. Sheen, C. H. Lee, S. D. Noh and K. Lee 37

Development of the MAIN algorithm for a cellular manufacturing machine layout. W. M. Chan, C. Y. Chan and C. K. Kwong 51

Precedence constrained TSP arising in printed circuit board assembly. E. Duman and I. Or 67

Capacity-constrained scheduling for a logic IC final test facility. J. T. Lin, F. K. Wang and W. T. Lee 79

Applying artificial neural networks and virtual experimental design to quality improvement of two industrial processes. X. Shi, P. Schillings and D. Boyd 101

Thermal conditions in stereolithography injection mould tooling and their use for polyether-ether-ketone moulding. R. A. Harris, R. J. M. Hague and P. M. Dickens 119

Understanding supply chain management: critical research and a theoretical framework. I. J. Chen and A. Paulraj 131

Bottleneck-focused scheduling for a hybrid flowshop. G.-C. Lee, Y.-D. Kim and S.-W. Choi 165

An intelligent parameter selection system for the direct metal laser sintering process. Y. Ning, J. Y. H. Fuh, Y. S. Wong and H. T. Loh 183

Optimal maintenance headcount allocation: an application of Chebyshev Goal Programming. J. P. Ignizio 201

Scheduling methods for the statistical setup adjustment problem: a correction and clarification. R. Pan and E. Del Castillo 211

Book reviews 213

No. 2 15 January 2004

Scheduling of Wafer Test Processes in Semiconductor Manufacturing. K. P. Ellis, Y. Lu and E. K. Bish 215

Numerical approximation approach to the producibility of composite position tolerance specifications for pattern of holes. M. Xi, E. A. Lehtihet and T. M. Cavalier 243

A hybrid GA/heuristic approach to the simultaneous scheduling of machines and automated guided vehicles. T. F. Abdelmaguid, A. O. Nassef, B. A. Kamal and M. F. Hassan 267

Collaborative order management in distributed manufacturing. C. Abid, S. D'Amours and B. Montreuil 283

MANPro: mobile agent-based negotiation process for distributed intelligent manufacturing. M. Shin and M. Jung 303

Agile production planning and control with advance notification to change schedule. R. Sato and T. L. Tsai 321

Optimization of robust design for multiple quality characteristics. F.-C. Wu and C.-C. Chyu 337

Optimal maintenance planning and crew allocation for multipurpose batch plants. H. Suryadi and L. G. Papageorgiou 355

Optimization design of control charts based on Taguchi's loss function and random process shifts. Z. Wu, M. Shamsuzzaman and E. S. Pan 379

Comparison of DBR with CONWIP in an unbalanced production line with three stations. S.-G. Koh and R. L. Bulfin 391

Path planning of functionally graded material objects for layered manufacturing. M. Y. Zhou 405

Analysis of parts requirements variance for a JIT supply chain. H. Aigbedo 417

Book review 431

No. 3 1 February 2004

Changes in Toyota Motors' operations management. Jos Benders and Masaya Morita 433

A tabu search heuristic for scheduling the production processes at an oil refinery. Jan A. Persson, Maud Göthe-Lundgren, Jan T. Lundgren and Bernard Gendron 445

Optimal path for automated drilling operations by a new heuristic approach using particle swarm optimization. G. C. Onwubolu and M. Clerc 473

Improving the path to align sales, production planning and engineering in high-variety versatile environment. P. Danese and P. Romano 493

Automated manufacturability assessment of rotational parts by grinding. D. Vinod Jacob, K. V. Ramana and P. V. M. Rao 505

Grouping and selecting products: the design key of Reconfigurable Manufacturing Systems (RMSs). M. R. Abdi and A. W. Labib 521

Auction-based distributed scheduling and control scheme for flexible manufacturing systems. T. Siwamogsatham and C. Saygin 547

Detecting process mean shift in the presence of autocorrelation: a neural-network based monitoring scheme. H. Brian Hwarng 573

Fault diagnosis of batch processes using discriminant model. Hyun-Woo Cho and Kwang-Jae Kim 597

Rescheduling strategies for minimizing total weighted tardiness in complex job shops. S. J. Mason, S. Jin and C. M. Wessels 613

On the shape of protective capacity in a simple line. J. H. Blackstone, Jr 629

Further insights into 'the stability of supply chains'. R. D. H. Warburton, S. M. Disney, D. R. Towill and J. P. E. Hodgson 639

Corrigendum. 649

No. 4 15 February 2004

Exact analysis of a discrete material three-station one-buffer merge system with unreliable machines. A. C. Diamantidis, C. T. Papadopoulos and M. I. Vidalis 651

Accounting for idle capacity cost in the scheduling of economic lot sizes. B. C. Giri and I. Moon 677

An empirical study of policies to integrate reactive scheduling and control in just-in-time job shop environments. Ramesh Bollapragada and Norman M. Sadeh 693

A new generic timed Petri net model for design and performance analysis of a dual kanban FMS. Erik L. J. Bohez 719

An augmented neural network classification approach to detecting mean shifts in correlated manufacturing process parameters. Christopher W. Zobel, Deborah F. Cook and Quinton J. Nottingham 741

Spare parts inventory and cycle time reduction. Carl R. Schultz 759

Solving the *n*-job 3-stage flexible flowshop scheduling problem using an agent-based approach. Astghik Babayan and David He 777

A machine-to-loop assignment and layout design methodology for tandem AGV systems with multiple-load vehicles. Ying-Chin Ho and Ping-Fong Hsieh 801

Acquisition of operations capability: A model and test across US and European firms. Keah Choon Tan, Vijay R. Kannan, Jayanth Jayaram and Ram Narasimhan 833

No. 5 1 March 2004

Just-in-time purchasing: an integrated inventory model involving deterministic variable lead time and quality improvement investment. J.-S. YANG and J. C.-H. PAN 853

The impact of job rotation on problem solving skills. J. M. ALLWOOD and W. L. LEE 865

Algorithm for optimal loss reduction in serial manufacturing. R. G. BATSON and S. SHISHOO 883

Identification of feature set for effective tool condition monitoring by acoustic emission sensing. J. SUN, G. S. HONG, M. RAHMAN and Y. S. WONG 901

Impact of information sharing on inventory replenishment in divergent supply chains. J. S. K. LAU, G. Q. HUANG and K. L. MAK 919

Original equipment manufacturers (OEM) manufacturing strategy for network innovation agility: the case of Taiwanese manufacturing networks. B.-W. LIN 943

Optimal buffer inventory and preventive maintenance for an imperfect production process. R. I. ZEQUEIRA, B. PRIDA and J. E. VALDÉS 959

Feature correlation for weld image-processing applications. C. BALFOUR, J. S. SMITH and S. AMIN-NEJAD 975

Comparative assessment of forecasts. E. G. JOHN 997

Fuzzy regression-based mathematical programming model for quality function deployment. Y. CHEN, J. TANG, R. Y. K. FUNG and Z. REN 1009

Material removal model for vibratory finishing. J. DOMBLESKY, R. EVANS and V. CARIAPA 1029

Note on 'Design of double- and triple-sampling X-bar control charts using genetic algorithms'. L.-F. HSU 1043

No. 6 15 March 2004

Management of uncertainty through postponement. B. YANG, N. D. BURNS and C. J. BACKHOUSE 1049

Feasibility and robustness of transiently chaotic neural networks applied to the cell formation problem. M. SOLIMANPUR, P. VRAT and R. SHANKAR 1065

Scanline-based stereo matching by genetic algorithms. F.-C. TIEN and C.-Y. TSAI 1083

Production and set-up control of a failure-prone manufacturing system. A. HAJJI, A. GHARBI and J. P. KENNE 1107

Model for the allocation of electronics components to reuse options. S. JORJANI, J. LEU and C. SCOTT 1131

A framework to review the information integration of the enterprise. RONALD E. GIACHETTI 1147

Synthesis of the 3D artefact for quick identification of thermal errors in machine tools. K.-D. KIM and S.-C. CHUNG 1167

Minimization of open orders: application of a re-distribution coordination policy. ALEXANDRE LINHARES 1189

Queuing network analysis approach for estimating the sizes of the time buffers in Theory of Constraints-controlled production systems. L. LOUW and D. C. PAGE 1207

Bayesian estimation of the rate at which a process, monitored by an $\bar{X}$ chart, goes out of control. E. A. SILVER and D. P. BISCHAK 1227

Minimizing makespan on parallel machines with release time and machine eligibility restrictions. G. CENTENO and R. L. ARMACOST 1243

Parameter setting of the Fuzzy ART neural network to part–machine cell formation problem. A. PEKER and Y. KARA 1257

Book Review 1279

No. 7 1 April 2004

Heuristic optimization system for the determination of index positions on CNC magazines with the consideration of cutting tool duplications. A. BAYKASOGLU and T. DERELI 1281

Car disassembly and ergonomics in Sweden: current situation and future perspectives in light of new environmental legislation. K. KAZMIERCZAK, J. WINKEL and R. H. WESTGAARD 1305

Systematic approach for the gap analysis of business processes. Y.-C. JUAN and C. OU-YANG 1325

Optimization of injection moulding conditions with user-definable objective functions based on a genetic algorithm. Y.-M. DENG, Y. C. LAM and G. A. BRITTON 1365

An approach to the automation of the assembly of flexible belt-shaped objects. H. OSAKI, S. MIYAZAKI, Y. KAJIHARA, Y. MUNESAWA and H. UCHIYAMA 1391

Approach to measure the mix response flexibility of manufacturing systems. N. VAN HOP 1407

A multi-objective genetic algorithm approach to the design of cellular manufacturing systems. M. SOLIMANPUR, P. VRAT and R. SHANKAR 1419

A unified framework for probabilistic sequential tolerance control. R. G. MCGARVEY, T. M. CAVALIER, E. DEL CASTILLO and E. A. LEHTIHET 1443

Learning and labour assignment in a dual resource constrained cellular shop. V. R. KANNAN and J. B. JENSEN 1455

Discussion of the standard processing time. H. JODLBAUER 1471

Book Review 1481

No. 8 15 April 2004

Local scheduling problems submitted to global FIFO processing constraints. V. BERNIER and Y. FREIN 1483

Development of an XML-based structural product retrieval system for virtual enterprises. C.-Y. TSAI, F.-C. TIEN and T.-Y. PAN 1505

Sequence alteration and restoration related to sequenced parts delivery on an automobile mixed-model assembly line with multiple departments. F.-Y. DING and H. SUN 1525

Evaluating the quality of project planning: a model and field results. O. ZWIKAEL and S. GLOBERSON 1545

Finite capacity scheduling with multiple tools and machines. R. L. MARTIN and C. WHITE 1557

Robust and reactive project scheduling: a review and classification of procedures. W. HERROELEN and R. LEUS 1599

Genetic algorithm based scheduling of parallel batch machines with incompatible job families to minimize total weighted tardiness. H. BALASUBRAMANIAN, L. MÖNCH, J. FOWLER and M. PFUND 1621

Network-based approach to modelling uncertainty in a supply chain. J. BLACKHURST, T. WU and P. O'GRADY 1639

Variational geometry based pre-inspection of a pattern of holes. Y. S. LIU and S. M. GAO 1659

A basic period approach to the economic lot scheduling problem with shelf life considerations. C. A. SOMAN, D. P. VAN DONK and G. J. C. GAALMAN 1677

Erratum 1691

Book Review 1693

No. 9 1 May 2004

Manufacturing system design with optimal diagnosability. J. P. LIU, Z. B. LUO, L. K. CHU and Y. L. CHEN 1695

A real options approach to project management. R. BOUTE, E. DEMEULEMEESTER and W. HERROELEN 1715

Due date assignment using artificial neural networks under different shop floor control strategies. S. Y. HSU and D. Y. SHA 1727

Heuristic and integrated approach for technical document authority and authentication sequence determination. J.-L. HOU, H.-C. CHUO and M.-T. SUN 1747

Integrated group technology, cell formation, process planning, and production planning with application to the emergency room. B. MALAKOOTI, N. R. MALAKOOTI and Z. YANG 1769

Coloured timed Petri net model for real-time control of automated guided vehicle systems. M. DOTOLI and M. P. FANTI 1787

General information model for representing machining features in CAPP systems. F. González and P. Rosado 1815

Implementing ISO 9000: performance improvement by first or second movers. E. Naveh, A. Marcus and H. Koo Moon 1843

A sequential ordering problem in automotive paint shops. S. Spieckermann, K. Gutenschwager and S. Voß 1865

Solving the machine-loading problem in a flexible manufacturing system using a combinatorial auction-based approach. Srivinas, M. K. Tiwari and V. Allada 1879

Erratum 1895

Book Review 1897

No. 10 15 May 2004

Chained cross-training of assembly line workers. R. R. Inman, W. C. Jordan and D. E. Blumenfeld 1899

Intelligent process design system for the transfer moulding of electronic packages. K. W. Tong, C. K. Kwong and K. M. Yu 1911

Empirical models of the effect of integrated manufacturing on manufacturing performance and return on investment. S. C. Henderson, P. M. Swamidass and T. A. Byrd 1933

Optimization of process plans using a constraint-based tabu search approach. W. D. Li, S. K. Ong and A. Y. C. Nee 1955

Competitive strategy and plant-level flexibility. A. R. Cannon and C. H. St John 1987

Productivity of synchronized serial production lines with flexible reserve capacity. T. Freiheit, M. Shpitalni, S. J. Hu and Y. Koren 2009

Joint optimization of preventive maintenance and inventory control in a production line using simulation. N. Rezg, X. Xie and Y. Mati 2029

An evolutionary approach for cooling system optimization in plastic injection moulding. Y. C. Lam, L. Y. Zhai, K. Tai and S. C. Fok 2047

Implications of form postponement to manufacturing: a case study. H. Skipworth and A. Harrison 2063

Optimal versus heuristic scheduling of surface mount technology lines. W. Kaczmarczyk, T. Sawik, A. Schaller and T. M. Tirpak 2083

Book review 2111

No. 11 1 June 2004

Model for integrating the supply chain of an appliance company: a value of information approach. H. Dominguez and R. S. Lashkari 2113

Cutter path generation for 2.5D milling by combining multiple different cutter path patterns. Z. YAO and S. K. GUPTA 2141

On-line tuning of a single EWMA controller based on the neural technique. C.-T. SU and C.-C. HSU 2163

Flexible modelling of correlated operation times with application in product-reuse facilities. P. M. STANFIELD, J. R. WILSON and R. E. KING 2179

Strategic capacity planning in supply chain design for a new market opportunity. S. S. CHAUHAN, R. NAGI and J.-M. PROTH 2197

Goal-orientation mechanism in a fractal manufacturing system. K. RYU and M. JUNG 2207

Application software system based on direct slicing for rapid prototyping. Y. SHI, X. CHEN, D. CAI and S. HUANG 2227

Connector-based approach to assembly planning using a genetic algorithm. H.-E. TSENG, J.-D. LI and Y.-H. CHANG 2243

Minimizing response time in a two-stage supply chain system with variable lead time and stochastic demand. E. LODREE JR, W. JANG and C. M. KLEIN 2263

Machine-vision-based surface finish inspection for cutting tool replacement in production. X. LI, L. WANG and N. CAI 2279

Scheduling in flowshops to minimize total tardiness of jobs. S. HASIJA and C. RAJENDRAN 2289

Control theory applications to the production–inventory problem: a review. M. ORTEGA and L. LIN 2303

Book Review 2323

No. 12 15 June 2004

Time bucket length and lot-splitting approach. J. RIEZEBOS 2325

Lower confidence bounds for C_{PU} and C_{PL} based on multiple samples with application to production yield assurance. W. L. PEARN, M. H. SHU and B. M. HSU 2339

Correlating business process re-engineering with the information systems department. V. S. LAI and R. K. MAHAPATRA 2357

Relationship between total productive maintenance and performance. S. A. BRAH and W.-K. CHONG 2383

Efficient five-axis machining of free-form surfaces with constant scallop height tool paths. H. LI and H.-Y. FENG 2403

Efficient algorithm for cell formation with sequence data, machine replications and alternative process routings. S. JAYASWAL and G. K. ADIL 2419

Single-track multi-hoist scheduling problem: a collision-free resolution based on a branch-and-bound approach. A. CHE and C. CHU 2435

An Extended Kalman filter for collaborative supply chains. T. Wu and P. O'Grady 2457

Automated visual inspection for microdrills in printed circuit board production. F.-C. Tien, C.-H. Yeh and K.-H. Hsieh 2477

A coordination strategy for distributed multi-agent manufacturing systems. D. Naso and B. Turchiano 2497

Weighted moving averages: an efficient plan for monitoring specific location shifts. R. Sparks 2521

Erratum 2529

Book reviews 2531

No. 13 1 July 2004

Exploiting information sharing, stock management and capacity oversizing in the management of lumpy demand. G. Miragliotta and A. P. Staudacher 2533

Managing product design quality under resource constraints. Y. Reich and E. Levy 2555

Numerical control machining of triangulated sculptured surfaces in a stereo lithography format with a generalized cutter. H.-T. Yau, C.-M. Chuang and Y.-S. Lee 2573

Virtual vehicle in the connecting transport automated material-handling system (AMHS). J. T. Lin, F. K. Wang and J. R. Young 2599

Optimizing machining economics models of turning operations using the scatter search approach. M.-C. Chen 2611

A Group of Weighted Moving Averages: An efficient plan for monitoring a range of process changes. R. Sparks 2627

TOC-based planning and scheduling model. J. Schaefers, R. Aggoune, F. Becker and R. Fabbri 2639

Understanding multivariate components – sheet metal assembly relationships using dimensional slow build studies. L. M. Garcia Guzman, P. C. Hammet and G. D. Herrin 2651

Models and algorithms for the dynamic-demand joint replenishment problem. F. F. Boctor, G. Laporte and J. Renaud 2667

Assessment of the effectiveness of a spindle power signal for tool condition monitoring in machining processes. D. Axinte and N. Gindy 2679

Production planning for surface mount technology lines. P. Rogers and R. Warrington 2693

Procedure for supplier selection based on C_{pm} applied to super twisted nematic liquid crystal display processes. W. L. Pearn, C.-W. Wu and H. C. Lin 2719

Book review 2735

No. 14 15 July 2004

Special Issue: Reactive systems modelling
Guest Editors: Nidhal Rezg and Xiaolan Xie

Editorial. N. Rezg and X. Xie 2737

The tool TINA – Construction of abstract state spaces for Petri nets and Time Petri nets. B. Berthomieu, P.-O. Ribet and F. Vernadat 2741

A method for the verification of a distributed and synchronized algorithm. F. Magniette, L. Pilard and B. Rozoy 2757

Analysing the PGM protocol with Uppaal. B. Bérard, P. Bouyer and A. Petit 2773

A fault-tolerant communication mechanism for cooperative robots. J. El Haddad and S. Haddad 2793

Ensuring the conformance of reactive discrete-event systems by means of supervisory control. T. Jéron, H. Marchand, V. Rusu and V. Tschaen 2809

Supervisory control of marked graphs with partial observations. Z. Achour, N. Rezg and X. Xie 2827

Pragmatic approach for modular control synthesis and implementation. D. Gouyon, J. F. Petin and A. Gouin 2839

Algebraic approach for dependable logic control systems design. J. M. Roussel, J. M. Faure, J. J. Lesage and A. Medina 2859

A scheduling heuristics for distributed real-time embedded systems tolerant to processor and communication media failures. A. Girault, H. Kalla and Y. Sorel 2877

Evaluation and improvement of response time bounds for real-time applications under non-pre-emptive fixed priority scheduling. A. Koubaa and Y.-Q. Song 2899

No. 15 1 August 2004

Empirical study of the relationship between operations strategy and information systems strategic orientation in an e-commerce environment. Q. Cao and M. J. Schniederjans 2915

Advanced planning and scheduling based on precedence and resource constraints for e-plant chains. C. Moon, J. S. Kim and M. Gen 2941

Data-mining-based methodology for the design of product families. B. Agard and A. Kusiak 2955

Impact of modelling approximations in supply chain analysis – an experimental study. J. Venkateswaran and Y. J. Son 2971

Multivariate control charts for process dispersion. J. Surtihadi, M. Raghavachari and G. Runger 2993

Practical methods of computer-aided flat pattern development for sheet metal components. K. S. R. K. Prasad and P. Selvaraj 3011

Collaborative design in a networked enterprise: The case of the telecommunications industry. H. Noori and W. B. Lee 3041

Feasibility study of the tactical design justification for reconfigurable manufacturing systems using the fuzzy analytical hierarchical process. M. R. Abdi and A. W. Labib 3055

Distributed production planning using a graph-based negotiation protocol. K.-J. Wang, D. Veeramani and J. Chen 3077

Distributed microflow sensor arrays and networks: design of architectures and communication protocols. Y. Liu and S. Y. Nof 3101

Book review 3117

No. 16 15 August 2004

Frequency approach for treating capacity-constrained multilevel production. A. Segerstedt 3119

Multicriteria decision-aid approach for product end-of-life alternative selection. A. Bufardi, R. Gheorghe, D. Kiritsis and P. Xirouchakis 3139

Fuzzy defect avoidance system (FDAS) for product defect control. D. Stewart, S. H. Cheraghi and D. Malzahn 3159

Adopting and implementing advanced manufacturing technology: new data on key factors from the aeronautical industry. J. A. D. Machuca, M. Sacristán Díaz and M. J. Álvarez Gil 3183

Requests network model for deadlock detection and avoidance in automated manufacturing systems. S. Lee, Y. Cha, H. Cho and M. Jung 3203

Feature vector: a graph-based feature recognition methodology. A. K. Verma and S. Rajotia 3219

Tolerance optimization using the Lambert *W* function: an empirical approach. M. S. Govindaluri, S. Shin and B. R. Cho 3235

Fuzzy geometric programming approach to a fuzzy machining economics model. S.-T. Liu 3253

A material allocation scheme for optical fibre cable manufacturing: a case study. T. J. Hodgson, S. D. Jackson, P. Qu and R. E. Cannon 3271

Integrated model for determining the optimal initial settings of the process mean and the optimal production run assuming quadratic loss functions. M. A. Rahim and F. Tuffaha 3281

Online design reuse tool for the support of the generation, embodiment and detailed design of products. S. K. Ong and D. O. Guo 3301

Book review 3333

No. 17 1 September 2004

Special Issue: Selected papers from the 17th ICPR 'Enterprise integration—a production perspective'

Editorial. C. O'Brien 3335

Managing innovation networks in the knowledge-driven economy. H.-J. Bullinger, K. Auernhammer and A. Gomeringer 3337

Collaborative agents for production planning and scheduling (CAPPS): a challenge to develop a new software system architecture for manufacturing management in Japan. Y. Nishioka 3355

Semi-heterarchical production planning structures in the support of team-based manufacturing. S. Rahimifard 3369

How does variability in input load relate to the probability of critically delayed delivery in a simple multipart re-entrant flow-line problem? E. H. Nielsen 3383

Integrative process plan model and representation for intelligent distributed manufacturing planning. D. N. Sormaz, J. Arumugam and S. Rajaraman 3397

Economic consequences of a production and inventory control policy. S. M. Disney and R. W. Grubbström 3419

Critical elements for a successful enterprise resource planning implementation in small- and medium-sized enterprises. T. C. Loh and S. C. L. Koh 3433

Multicriteria dynamic scheduling methodology for controlling a flexible manufacturing system. B. Shnits, J. Rubinovitz and D. Sinreich 3457

Computer-aided set-up planning for machining centres configuration. P. Contini and T. Tolio 3473

Virtual reality-based approach to manufacturing process planning. K. Okulicz 3493

Framework for designing a flexible cellular assembly system. R. Manzini, M. Gamberi, A. Regattieri and A. Persona 3505

Layout design in fractal organizations. S. M. Saad and A. M. Lassila 3529

Framework for the control of automated material-handling systems using the holonic manufacturing approach. R. F. Babiceanu, F. F. Chen and R. H. Sturges 3551

Unified structural–procedural approach for designing integrated manufacturing systems. J. Macedo 3565

Production projects – Designing and operating lifecycle-oriented and flexibility-optimized production systems as a project. J. C. Aurich and P. Barbian 3589

Economic evaluation of disassembly processes in remanufacturing systems. O. Tang, R. W. Grubbström and S. Zanoni 3603

Optimal control of a remanufacturing system. K. Nakashima, H. Arimitsu, T. Nose and S. Kuriyama 3619

Tailored toolkit to enable seamless supply chains. P. CHILDERHOUSE, S. M. DISNEY and D. R. TOWILL 3627

Reconfigurable logistics systems in production and disassembly networks. H. BAUMGARTEN, R. KLINKNER and T. SOMMER-DITTRICH 3647

Proposal of a concept of future oriented machine tools for advanced manufacturing systems. H. NARITA, K. SHIRASE, E. ARAI, K. NAKAMOTO, L.-Y. CHEN and H. FUJIMOTO 3657

Automation of the computer-aided design–computer-aided quality assurance process chain in car body engineering. S. MBANG and S. HAASIS 3675

Development of 'Science TQM', a new principle of quality management: effectiveness of strategic stratified task team at Toyota. A. KAKURO 3691

Tool management in flexible manufacturing systems with network part program. A. MATTA, T. TOLIO and F. TONTINI 3707

Critical success factor framework for the implementation of integrated-enterprise systems in the manufacturing environment. L. T. HO and G. C. I. LIN 3731

UL-PML: constraint-enabled distributed product data model. Y. WANG and B. O. NNAJI 3743

Development of a parallel processing multi-agent architecture for a virtual CIM system. D. WANG, S. V. NAGALINGAM and G. C. I. LIN 3765

The information gap between design engineering and materials supply systems design. E. JOHANSSON and M. I. JOHANSSON 3787

No. 18 15 September 2004

Integrated design approach for virtual production line-based reconfigurable manufacturing systems. Y. TANG and R. G. QIU 3803

Operational design of a supply chain system using the Taguchi method, response surface methodology, simulation, and optimization. J. S. SHANG, S. LI and P. TADIKAMALLA 3823

Modified analytic hierarchy process to incorporate uncertainty and managerial aspects. R. BANUELAS and J. ANTONY 3851

An evaluation of routing policies for order-picking operations in low-level picker-to-part system. H. HWANG, Y. H. OH and Y. K. LEE 3873

An optimization model for selective inspection in serial manufacturing systems. V. KAKADE, J. F. VALENZUELA and J. S. SMITH 3891

A two-phase heuristic algorithm for cell formation problems considering alternative part routes and machine sequences. C. O. KIM, J.-G. BAEK and J.-K. BAEK 3911

Process tolerance allocation in angular tolerance charting. J. XUE and P. JI 3929

Coordinating quality, production and sales in manufacturing systems. S. IOANNIDIS, V. S. KOUIKOGLOU and Y. A. PHILLIS 3947

Fuzzy multiple objective decision making approach to prioritize design requirements in quality function deployment. E. Ertugrul Karsak 3957
Development of a knowledge model for managing schedule disturbance in steel-making. R. Roy, B. A. Adesola and S. Thornton 3975
A general algorithm for profiling and dressing grinding wheels when using a grinding spindle on a CNC lathe. A. T. Abbas 3995
Erratum 4009
Call for Papers 4011
Call for Papers 4013

No. 19 1 October 2004

Tabu-search simulation optimization approach for flow-shop scheduling with multiple processors — a case study. T. Yang, Y. Kuo and I. Chang 4015
A digraph approach to TQM evaluation of an industry. S. Grover, V. P. Agrawal and I. A. Khan 4031
Genetic algorithm for facilities layout problems based on slicing tree structure. E. Shayan and A. Chittilappilly 4055
Optimal part deposition orientation in FDM by using a multicriteria genetic algorithm. P. M. Pandey, K. Thrimurthulu and N. V. Reddy 4069
Scheduling parallel batch processing machines with arbitrary job sizes and incompatible job families. S.-G. Koh, P.-H. Koo, J.-W. Ha and W.-S. Lee 4091
Integrating statistical process control, engineering process control and Taguchi's quality engineering. S. O. Duffuaa, S. N. Khursheed and S. M. Noman 4109
Evolving knowledge for the solution of clustering problems in cellular manufacturing. C. Dimopoulos and N. Mort 4119
The impact of information transparency on the dynamic behaviour of a hybrid manufacturing/remanufacturing system. O. Tang and M. M. Naim 4135
Recognition of defect spatial patterns in semiconductor fabrication. H.-W. Hsieh and F.-L. Chen 4153
Impact of work teams: a comparison study of assembly cells and assembly line for a variety of operating environments. K. Sengupta and F. R. Jacobs 4173
Set-up games: a heuristic game-theoretic approach to set-up decisions for heterarchical manufacturing systems. P. McDonnell, S. Joshi and R. G. Qiu 4195
Minimizing makespan on parallel batch processing machines. P.-Y. Chang, P. Damodaran and S. Melouk 4211

No. 20 15 October 2004

An improved algorithm for optimizing product mix under the theory of constraints. M. B. Aryanezhad and A. R. Komijan 4221

Scheduling with product family set-up times: an application in TFT LCD manufacturing. H. J. Shin and V. J. Leon 4235

General run-to-run (R2R) control framework using self-tuning control for multiple-input multiple-output (MIMO) processes. C.-H. Jen, B. C. Jiang and S.-K. S. Fan 4249

Information aggregation in industrial performance measurement: rationales, issues and definitions. L. Berrah, G. Mauris and F. Vernadat 4271

Synergy between evolutionary optimization and induction graphs learning for simulated manufacturing systems. A. L. Huyet and J. L. Paris 4295

Minimizing L_{max} for the single machine scheduling problem with family set-ups. S. R. Schultz, T. J. Hodgson, R. E. King and M. R. Taner 4315

Defect inspection of patterned thin film transistor-liquid crystal display panels using a fast sub-image-based singular value decomposition. C.-J. Lu and D.-M. Tsai 4331

Real-time due-date promising by build-to-order environments. S. Moses, H. Grant, L. Gruenwald and S. Pulat 4353

Influence of initiators on supply chain value creation. J. Jayaram, V. R. Kannan and K. C. Tan 4377

Comparison of push and pull control strategies for supply network management in a make-to-stock environment. W. Masuchun, S. Davis and J. W. Patterson 4401

A note on an industrial strategy for stock management in supply chains: modelling and performance evaluation. S. Zanoni and R. W. Grubbstrom 4421

Book Reviews 4427

No. 21 1 November 2004

Modelling and rescheduling of a re-entrant wafer fabrication line involving machine unreliability. R. Kumar, M. K. Tiwari and V. Allada 4431

Integrated model for supplier selection and negotiation in a make-to-order environment. A. Cakravastia and K. Takahashi 4457

Layout optimization considering production uncertainty and routing flexibility. S. Kulturel-Konak, A. E. Smith and B. A. Norman 4475

Concurrent optimization of the design and manufacturing stages of product development. A. Lamghabbar, S. Yacout and M. S. Ouali 4495

Determining a collision-free domain for the tool in five-axis machining. F. Monies, M. Mousseigne, J.-M. Redonnet and W. Rubio 4513

Parallel machine scheduling considering a job-splitting property. Y.-D. Kim, S.-O. Shim, S.-B. Kim, Y.-C. Choi and H. M. Yoon 4531

Dynamic state-dependent dispatching for wafer fabrication. J. C. Chen, C.-W. Chen, C.-Y. Tai and J. C. Tyan 4547

Optimal inventory costs in a complementary flexible manufacturing system. R. Thomas and M. D. Troutt 4563

Adaptive Resonance Theory-based neural algorithms for manufacturing process quality control. M. Pacella, Q. Semeraro and A. Anglani 4581

A new multi-objective optimization method for master production scheduling problems using simulated annealing. G. E. Vieira and P. C. Ribas 4609

Information deduction approach through quality function deployment for the quantification of the dependency between design tasks. C.-H. Chen, L. P. Khoo and L. Jiao 4623

A note on "Frequency approach for treating capacity constrained multi-level production", IJPR, 42, 3119–3137. A. Segerstedt 4639

No. 22 15 November 2004

Reconfiguration of a job shop to respond to product mix changes based on a virtual production system concept. K.-C. Ko and P. J. Egbelu 4641

Channel coordination in an assembly system facing uncertain demand with synchronized processing time and delivery quantity. X. Zou, S. Pokharel and R. Piplani 4673

Material and design considerations for Rapid Manufacturing. R. Hague, S. Mansour and N. Saleh 4691

Reconfigurable layout problem. G. Meng, S. S. Heragu and H. Zijm 4709

A branch-and-bound algorithm for a two-stage hybrid flowshop scheduling problem minimizing total tardiness. G.-C. Lee and Y.-D. Kim 4731

Iterative approach to operation selection and sequencing in process planning. D.-H. Lee, D. Kiritsis and P. Xirouchakis 4745

New cycle time and space estimation models for automated storage and retrieval system conceptualization. F. Eldemir, R. J. Graves and C. J. Malmborg 4767

Optimal cutter selection for complex three-axis NC mould machining. X. M. Ding, Y. Q. Lu, J. Y. H. Fuh and K. S. Lee 4785

Dynamic scheduling of batch servers with compatible product families. D. J. Van Der Zee 4803

Agent-based design framework for riser and gating system design for sound casting. R. Ranjan, N. Kumar, R. K. Pandey and M. K. Tiwari 4827

No. 23 1 December 2004

Impact of scheduling free goods on the throughput performance of a manufacturing operation. J. B. Atwater, A. A. Stephens and S. S. Chakravorty 4849

Tolerance-based process plan evaluation using Monte Carlo simulation. SAMUEL H. HUANG, QIU LIU and RAMI MUSA 4871

Minimizing L_{max} for large-scale, job-shop scheduling problems. S. R. SCHULTZ, T. J. HODGSON, R. E. KING and K. A. THONEY 4893

Quality-yield measure for production processes with very low fraction defective. W. L. PEARN, Y. C. CHANG and CHIEN-WEI WU 4909

Theory of constraints-based methodology for effective ERP implementations. G. IOANNOU and C. PAPADOYIANNIS 4927

Sequencing problem for a mixed-model assembly line in the Toyota production system. S. KOTANI, T. ITO and K. OHNO 4955

A real-time methodology for minimizing mean flowtime in FMSs with machine breakdowns: threshold-based selective rerouting. S. OZMUTLU and C. M. HARMONOSKY 4975

Re-planning support system for make-to-order production with reserved resources. C. THIERRY, J. LAMOTHE and V. GALVAGNON 4993

Selecting quality improvement projects and product mix together in manufacturing: an improvement of a theory of constraints-based approach by incorporating quality loss. G. KÖKSAL 5009

Optimal algorithm for minimizing production cycle time of a printed circuit board assembly line. D. M. KODEK and M. KRISPER 5031

On the who-rule in Dual Resource Constrained (DRC) manufacturing systems. J. A. C. BOKHORST, J. SLOMP and G. J. C. GAALMAN 5049

Book Reviews 5075

No. 24 15 December 2004

Scenario-based approach for flexible resource loading under uncertainty. G. WULLINK, A. J. R. M. GADEMANN, E. W. HANS and A. VAN HARTEN 5079

Manufacturing system engineering ontology for semantic interoperability across extended project teams. H.-K. LIN, J. A. HARDING and M. SHAHBAZ 5099

Conceptualizing automated palletizing systems. F. ELDEMIR, R. J. GRAVES and C. J. MALMBORG 5119

Heuristic dispatching rule to maximize TDD and IDD performance. T. F. HO and R. K. LI 5133

Analysis and control/monitoring of the direct linear drive in end milling. B. DENKENA, H. K. TÖNSHOFF, X. LI, J. IMIELA and C. LAPP 5149

Price-driven economic order systems from a thermodynamic point of view. M. Y. JABER, R. Y. NUWAYHID and M. A. ROSEN 5167

A genetic algorithm-based solution to optimal tolerance synthesis of mechanical assemblies with alternative manufacturing processes:

focus on complex tolerancing problems. P. K. SINGH, P. K. JAIN and S. C. JAIN 5185

Estimating the out-of-control rate from control chart data in the presence of multiple causes and process improvement. D. P. BISCHAK and E. A. SILVER 5217

Reducing feedback requirements of workload control. P. HENRICH, M. LAND, G. GAALMAN and D.-J. VAN DER ZEE 5235
